Notes of Accounts

- Fixed Assets are valued at historical cost convention basis. No depreciation has been charged as the Fixed Assets in the books of Accounts. Assets acquired out of Research grants, although shown as utilization of the grants, have been capitalized to the tune of Rs. 2,02,07,382.00 and have been separately disclosed to that extent in the Receipts and Payments Account.
- The Research Accounts has been receiving funds from various Funding Agencies for carrying on research project on different issues. On the completion of the project the unutilized funds (if any) should be refunded to the Funding Agency.
- Research Accounts have adopted cash basis of accounting. However Unutilized research grant have been shown the under current Liabilities in the balance sheet.
- The Research Cell earns interest from Savings account in which it holds funds for research grants. In a few cases interest has to be refunded to the funding agencies. Both interest earned and interest refunded have been separately disclosed in the final accounts. Further, interest earned on fixed deposits is recognized as the difference between the Principal Value and the Maturity Value.
- HRA and EWC collected by Research Cell have been separately disclosed in the balance sheet as current liabilities.
- The Bank Reconciliation statement for the bank accounts contain large number of entries pertaining to cheques issued but not presented in the bank for payment. Many of these entries have become time bared for payment through the payment instrument originally issued by the Research Cell. In such cases these entries may be reversed and efforts may be made for making payment of these liabilities afresh.
- A large number of amounts have been credited by bank and are standing unadjusted in the bank account statement. It is suggested that details of such entries are obtained from bank and transactions are recorded in the books of accounts.
