6 Day Course designed with classroom and on-ground practical sessions to develop the understanding of public health management in the context of community process and intervention techniques. The participants will learn the following :

- Fundamental of Public Health
- Overview of National Health Mission
- Key Health Programs
- Community Process
- Community- Level interventions
- Data collection methods
- Monitoring
- Communication Methods

Public Health And Community Level

COURSE OBJECTIVES

Identify and address the concepts of population health, and the basic processes, approaches, and interventions which focus on the major health-related needs and concerns of populations.

COURSE OUTCOMES

Describe the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public health policy. Integrate the core elements of public health with a selected area of specialization to recognize how the field of public health applies to individuals, communities, and society overall.

Lt Col Varun Bajpai VSM
Executive Registrar
SGPGIMS, Lucknow
