Overall assessment: Excellent/Good/Below average/poor
Self-appraisal (to be filled up by the student): [please mention your strength, weakness, measures taken to rectify your shortcoming]

- Strength : hardworking

- Weakness :

  1) Time management - unable to make time to read on a case to case basis
     Solution : will try to read more while moving around in the hospital to get work done.

  2) Lack of clarity of thought - probably stems from lack of knowledge of the management of GI disorders, I ~~often~~ sometimes find myself doing what I am told to do but not having a clarity of why

     Solution : ask more questions to seniors to learn better.

Overall assessment: Excellent/Good/Below average/poor
Self-appraisal (to be filled up by the student): [please mention your strength, weakness, measures taken to rectify your shortcoming]

Strength : I am a cheerful person who maintains a good interpersonal relationship with colleagues, staffs, that makes a friendly working environment and improves efficiency. I am able to counsel patients better. I realise that my gastro training is inadequate and its a vast subject. I will strive for excellence.

Weakness : I lack confidence. I am not reading at home. I don't try to learn when I work. Due to work pressure sometimes, I tend to work at spinal level. I also lose my cool & sometimes i am rudely shouting at patients. I used to be nice before. My history taking is poor. I am a slow learner.
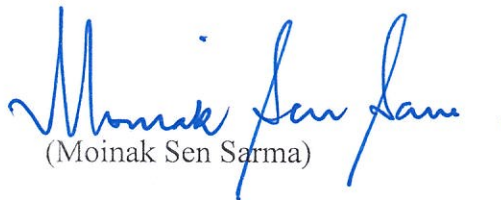

Measures to rectify : I previously had a ~~previous~~ gastro training for one year. I realised, i am not good and as per Dr. Rohan malik and Dr. srinivas sir's advice, I was determined to get more training in SGPGI. Here i got a new insight. I will use this opportunity to improve my knowledge and skills. I should learn more evidence based things. I should read more. I should improve my history taking.
